

- Up to 32 canisters 3L or 16 X 10L
- 7kg 0.1gm electronic scale
- Electric can table
- Stainless steel Twin Ball Valves®
- Inkpro Software
- Flow rate 0.4 up to 1.2liter/minute

The HA 600 system, is conceived with the aim of offering to small sized printer, an affordable solution for automatic ink dispensing. The dispensing system makes the printer able to reproduce any colour at any time. Being fully automatic and easy to use, the system enable the printing press operator to obtain the desired quantity of ready to use inks with notable reduction in waste.

It features the high precision stainless steel Twin Ball Valve® pump (2, 5 or 10 fl.oz.). Accuracy (0.1 gm) and durable piston pump (speed up to 1.2 liter/minute, depending on the colorant) are combined. Including a fully automatic brushing system and centralized automatic bottom stirring.

Available on option:

- Manual control
- Automatic - Semiautomatic Mixer
- Label printer
- Barcode reader
- Network connection
- Spectrophotometer connection
